
BUYER CONFIDENCE · PROCUREMENT · REFERRALS

Human-Attested Trust Pack

How 1205 works — for procurement, boards, and referring counsel.

One page you can forward: where AI assists, what a named senior practitioner owns, and the boundaries we hold.

AI ASSISTS, A PERSON OWNS

- AI helps with research, drafting, and pattern-finding — it is never the analyst or the author
- A named senior 1205 practitioner reviews, edits, and authors the final deliverable
- Findings and recommendations are human work product, attributable to a person

THE BOUNDARIES WE HOLD

- Investigation independence — the investigation is kept separate from any remediation
- Public forms collect low-sensitivity routing information only — no confidential complaint material
- Privacy — we collect only what a matter needs, keep it access-controlled, and never feed your confidential material into public AI tools
- Conflicts — checked before we accept a matter

WHAT WE DO NOT DO

- No legal, tax, or immigration advice
- No issuing or guaranteeing any certification — we route regulated work to the right professional

Boundary: 1205 does not provide legal, tax, immigration, or certification services and does not issue or guarantee any certification. This pack describes how we work.
